

THE CHRONICLE *Edmonton*

VOL. XIII. No. 26.

CROSSFIELD, ALBERTA, THURSDAY, JULY 26th, 1920.

PRICE \$1.50 A YEAR.

WM. LAUT

LOOK for the PROOF !

Don't Get Wise When it is Too Late.

Every farmer knows how important it is to be able to get necessary repairs or expert assistance for farm machinery, especially in haying and harvest time.

Every dealer claims he can give it.

WE INVITE INSPECTION of our repair room. Our new stock of Extras for Mowers, Rakes and Binders has arrived and is stowed away in accessible, numbered bins where you can get it quick. We have a larger stock than ever and can give you better service—make us prove it.

Keep this in mind too when you buy New Machinery

William Laut,
Groceries, Hardware, Implements, Harness.

A SAVINGS ACCOUNT

It is always well to have a Savings Account upon which interest is regularly paid and from which you are free to draw at any time should you have a good opportunity to buy stock or feed. A Savings Account is Ready Money.

THE CANADIAN BANK OF COMMERCE

PAID-UP CAPITAL \$15,000,000
RESERVE FUND \$15,000,000
CROSSFIELD BRANCH, F. L. Watters, Manager.

LUMBER

If you buy your Lumber from us you keep your money in the district.

We buy all our supplies, feed etc., in the district.

Every man we have engaged (except the surveyor) belongs to the district.

Our Lumber is second to none in quality.

As we sell direct to you, and have no freight rates to pay or any middleman's profit we can and do sell cheaply.

WE INVITE INSPECTION OF OUR STOCK

The Silver Creek Lumber Co.,
CREMONA, Alta.

Mill on Sec. 5-30-6-5.

VALIQUETTE & DINGLE

BARRISTERS AND SOLICITORS
Calgary Office: 810a First Street West.
Phone 21467.

Mr. Valiquette at Crossfield every Saturday.
During July and August by appointment only.

Local and General

Mr. and Mrs. B. W. McFarlane are away on an auto trip, intending to take in Seattle, and several other cities.

Mrs. C. Wicks and Lisle of Clive, Alta. late of Crossfield are visiting in town as the guests of Mr. and Mrs. D. Ontkes.

Mrs. Taylor of Cochrane, was a visitor on Tuesday, calling at the office to look up the Editor and Mrs. Whitfield.

The Trail Rangers' of Crossfield returned from their camp at Innis Lake on Monday, the boys all looked well after their outing and they report having had a good time.

Mr. D. Ontkes is being kept on the jump these days, since the hail visited the district north and east of Crossfield, Dick has been going the rounds adjusting insurance.

The building of new local bank premises for the Imperial Bank of Canada is under consideration. We hear building operations are to be commenced at an early date.

CHURCH OF THE ASCENSION.

Sunday, August 1st.
10 a. m. Sunday School.
11 a. m. Morning Prayer and Holy Communion.

The Bishop of Calgary will officiate.

UNION CHURCH, CROSSFIELD

Sunday, July 25.

Rev. R. K. Swenerton, B.A., B.D., Pastor.

Mr. S. Willis, Musical Director.

Mrs. M. Thomas, Organist.

Mr. D. A. Jeffery, Sunday School Superintendent.

Sunday School & Bible Class 2 p. m.

Preaching Service at 7.30 p. m.

We understand that Mr. F. Collicut is having two large silos built on the Willow Spring Ranch. We assume that these are the first to be built in the district. The advantages of ensilage are many and there is no doubt many stockmen will adopt this mode of feeding in the future.

The Crossfield Baseball team met Airdrie in two friendly games during the past week, winning one game and losing one. They very kindly donated the gate receipts of both games to the Chautauqua guarantors to help reduce the deficit.

The Chautauqua Committee requests that those who have not yet turned in the envelopes distributed on the last day of the Chautauqua, please hand same to Mr. Watters, Bank of Commerce. Any other donations towards the deficit, which amounts to about \$150, will be welcomed. This appeal is being made in order that the call on the guarantors may be as light as possible.

Mr. L. Skinner who has been employed in Halliday's store for the past few months is returning to Carmarby, his former employer having offered him promotion and substantial raise in salary. Lefty will pitch his last game for Crossfield against Didsbury on Friday night, he has certainly been a great asset to the local team and will be missed very much in the line-up. He has made many friends during his short stay in Crossfield.

CROSSFIELD CASH STORE

SHOES !!

Comment on Current Events

The last few days of June and the first few days of July were prolific in important changes in the political life of Canada, and in some respects these were but indicative of the unsettled state of politics generally throughout this and other countries. Union Government, which was brought into being through the efforts of Sir Robert Borden as a war administration late in 1917, having fulfilled its destiny, has passed away. Sir Robert Borden has laid down the responsibilities of the premiership, and these have been placed on the younger shoulders of Hon. Arthur Meighen, who is not only the youngest premier Canada ever had, but also the first man from west of the Great Lakes to achieve that high office. His Government will be representative of the new political organization which supercedes the Conservative and Unionist parties in Federal politics and which has been named the National Liberal and Conservative Party. In addition to Sir Robert Borden, Hon. N. W. Rowell and Hon. Martin Burrell retire from the Government; consequently the first test of the strength of the new administration with the public will come with the election of the new ministers to be chosen.

A second change of moment was the resignation of Sir Lomer Gouin from the premiership of Quebec, an office he has held for the past fifteen years, and a longer period than any of his predecessors. Sir Lomer's retirement does not mean any marked change in the Quebec Government. He is leaving political life to engage in the activities of business, commerce and finance, and is succeeded in the premiership of Quebec by one of his former cabinet colleagues, Mr. Taschereau.

Even more significant of prevailing public opinion in Canada today was the result of the Manitoba Provincial elections which has created in the oldest of the prairie provinces a situation somewhat similar to that existing in Ontario. Of the four largest groups in the next legislature—Liberal, Farmer, Conservative and Labor, no one commands a clear majority in the house. Followers of the Norris Government constitute the largest single group, with Labor second, Farmers third, and Conservative fourth, with few independents in addition. The Norris Government will carry on with the support of certain of the Farmer and Independent members, while Labor will probably constitute the official opposition party.

The Manitoba elections were also noteworthy by reason of the fact that for the first time in Canada the system of Proportional Representation was applied in a Parliamentary election, the city of Winnipeg electing its ten representatives by that method. All parties seem agreed that it

was a marked success and gave general satisfaction. With ten members to be elected out of a list of 41 candidates nominated, and with 48,000 ballots cast, the new system was given the hardest test yet applied to it in any English-speaking country, and the successful outcome would seem to point to its early adoption throughout Canada.

As indicating that there has been little change in the war-time sentiment of people on the question of New Brunswick referendum is of interest. Two questions were submitted to the electorate: (1) "Whether the prohibition laws should be retained, importation stopped, and a bone-dry condition created, or (2) whether the sale of wines and beer should be permitted. By a vote of three to two the people declared against the sale of wines and liquor, and by a two-to-one vote emphatically recorded their preference for absolute prohibition of the traffic in intoxicants for beverage purposes.

While the people of Canada have thus been engaged in their own political affairs, in the United States the Republican and Democratic parties have adopted their platforms for the presidential elections next November and named their candidates. A clear-cut issue on the Peace Treaty and League of Nations is now presented to the American people, and the voters will themselves decide the issue, the Republicans bitterly condemning the acts of President Wilson at the Peace conference, and the Democrats upholding the League of Nations as necessary for the future preservation of the peace of the world. While not concerned in the essentially domestic policies of the United States, Canadians will follow with keen interest the struggle for and against acceptance by the United States of a place in the League of Nations and as a co-partner with the other civilized peoples of the world in maintaining the highest international ideals.

Minard's Liniment Relieves Distemper.

Horses in Saskatchewan
(Buffalo Express)
Saskatchewan is generally associated in the mind with cold weather and wheat. It is surprising to learn, therefore, that it leads the Canadian provinces in horse population, there being a total of 1,078,000.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are mild but thorough laxative which can always be depended upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them Mrs. Thomas A. Boutot, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Overcrowding the Earth

Estimated That In 170 Years From Now Maximum Population Will Be Reached.

According to the statistics, the population of the world cannot go on indefinitely at the present rate. It has been estimated that if it does, then we are near the end of our tether. In about 170 years from now the maximum population that the earth can support will be reached! The only country at the present time that is reasonably living within its assets of land is France, for to double her population requires 433 years. If the present rate of increase of the population of the world is maintained (supposing such a thing possible), then in 2,000 years from now the population would be twenty-five times greater than it is now.

P. Beddingfield Dead
Frank Beddingfield, from whom the Prince of Wales bought his Alberta ranch, is dead in England, according to a cable to Geo. Lane of the Bar U ranch.

Saw Possibilities In Experiment

Liverpool Dockmaster Evolved Principle of Modern Lighthouse
Sometimes during the latter part of the eighteenth century a scientific person of London made a wager that he would read a newspaper by the light of a "fishing dip" at a distance of 30 feet. To do this the scientist merely coated the inside of a shallow box with sloping pieces of looking glass so as to form a concave lens, put his fishing dip into the box and readily deciphered the small print at the stipulated distance. The experiment was witnessed by a Liverpool dockmaster. He was a thinking man and saw great possibilities in this learned jest. He straightway adapted the principle to lighthouse requirements and forthwith with the modern reflected light with its mile of range and greatly multiplied life-saving powers sprang into being.

Don't Hawk, Blow, Sneeze, or Cough Use "Catarrhazone"

When germs attack the lining of the nose, make you sneeze and gag—when later on they infect the bronchial tubes—you follow them with a cough syrup! You can't do it—that's all. Cough syrups go to the stomach—that's why they fail. But Catarrhazone goes everywhere gets right after the germs—kills them—breaks the soreness—cures the inflammation—makes Catarrh disappear. No difficulty with Catarrhazone to cure, because it contains the essence of pine balsams and other antiseptics that simply mean death to catarrh. Large size costs \$1.00 and contains two months' treatment; smaller sizes 25c and 50c, all drug stores and druggists.

Pulp Mill for Port Arthur

Provincial Paper Mills Will Spend a Million and a Half on Undertaking.

Port Arthur will be the scene of important developments in paper manufacture when the plans are completed of the Provincial Paper Mills, Limited, Toronto, who have just been incorporated. About \$1,500,000 is estimated to be the amount to be spent in Port Arthur. The plant, which occupies 140 acres in the city of Port Arthur, has turned out about \$20,000,000 of sulphite, which has been sold in the United States, chiefly in Wisconsin and Minnesota. It is now intended to complete the product into paper on this side, with a mill to turn out forty tons a day. With the expenditure of \$200,000 on the mill, absorbed by the new company, these productions will be increased.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Gray's worm exterminator will protect the children from these distressing afflictions.

An Unvalued Site (London Daily Chronicle)

The news that the Bank of England is to be rebuilt draws attention to a fact which has often puzzled business men, and that is that the site on which the present buildings stand has never been valued, though it is undoubtedly the most famous in the world. What is more, the balance-sheet of the bank never includes the site and the buildings as an asset, though if these were in the possession of any other company they would probably be included as worth anything up to 10,000,000 pounds. But the bank's position is so secure that it can afford to neglect even such a great asset.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as candy. Most children will refuse them. In some cases they cause vomiting through their action in the stomach, but this is only a manifestation of their cleansing power, no indication that they are hurting. They can be thoroughly depended upon to clear all worms from the system.

Valuable hardwood forests abound in Panama.

Minard's Liniment Relieves Colds, etc.

To Further Lignite Project

Additional Grant of \$200,000 Made to Saskatchewan Briquetting Plant.

To meet the increased cost of construction of the lignite briquetting plant an additional appropriation of \$200,000 has been made. This makes the total vote for the plant \$600,000. Of the additional vote, \$100,000 is being provided by the federal government, the governments of Saskatchewan and Manitoba dividing the other \$100,000 between them. This is the same ratio as the original vote.

The lignite utilization board has found it impossible to complete the project on the original grant of \$400,000. A recent estimate shows the total cost will be about \$600,000, exclusive of housing. In order to compare these prices with the original estimate of \$400,000, the board made a careful enquiry into the price of the present contemplated plant had it been erected in 1917, the date at which the original research committee report was prepared. The result was a total estimate of \$390,000, which shows that the present designs are no more elaborate than were contemplated originally.

The Hon. Arthur Meighen agreed that the federal government would contribute another \$100,000 on condition that Manitoba and Saskatchewan would each contribute a further \$50,000. The question has been taken up by Mr. Meighen with the two provincial governments and so far as Saskatchewan is concerned, the additional appropriation will be met.

Roumania Wants Canadian Trade

Roumanian firms of paper users are turning to the United States and Canada for their supplies, according to announcements in this week's bulletin of the department of trade and commerce. Other Canadian products being sought by Roumanian firms include: Leather and leather goods, including books and shoes, textiles, furs, fresh and canned foodstuffs, drugs and chemicals and iron.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope by curing his trouble—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

To Keep Meat.

During hot months buy cornmeal, graham flour, or cereals in smaller quantities, then can in airtight glass jars, for insects seek dark places mostly to do their damage. If one is afraid it has been visited by insects, lift and place a hot iron in the slow pans—heat almost to the scorching point, then cool before bottling, to insure it from getting musty. If cornmeal does scorch a trifle it gives a pleasant parched flavor to corn bread or mush.

One Great Essential To a Woman's Health Is Her Nerves

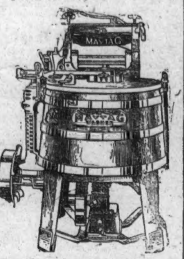

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay more attention to their social and household duties than they do to their health. Is it any wonder then that they become irritable and nervous, have hot flushes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy.

Millburn's Heart and Nerve Pills are the very remedy that nervous, tired-out, weary women need to restore them to the blessings of good health. Mrs. P. H. Ryan, Sand Point, N.S., writes: "I have been a great sufferer from nervous troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not get to sleep at night without trembling. I had hot flushes and fainting spells. When I was on my second box of Millburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in the house and recommend them to all who suffer from nervous troubles."

Price 50c a box at all dealers or mailed direct on receipt of price by The Millburn Co., Limited, Toronto, Ont.

Maytag Multi-Motor Washer

THERE is a Maytag Washing Machine for every need—Electric, Hand, or Power Driven, and for every size of household. It is a built-in machine, with two cycle, acid-cure engine, and equipped with the Swinging, Reversible Washer. This is without a question the best washing machine in the world for use on the farm or in towns where no electricity is to be had.

We have either a hardware dealer or an Implement or General Store in every town in Western Canada. Look one up and ask him to show you the Maytag. Just what this machine is. If you do not see it, drop us a card, giving us the name of a dealer you would like to see. We will send you a copy of our Free Household Manual, containing a hundred of valuable suggestions about washing and handling fabrics and also describe the machine.

One of the most delightful features of the Maytag Multi-Motor Washer is ease of operation. Women everywhere agree that it is perfectly simple. Put hot water and soap into the generous cyrena wood tub. Fill it with clothes. Turn the special starting wheel a flip with your foot. That is all. With a business-like push-pull the little Multi-Motor goes about its work and chases all the wash-day worry from your face.

Many, many homes not having electricity are today enjoying this great convenience perfected in the famous Maytag factories.

It is the only washing machine in the world with a gasoline motor built right into the machine.

Handles heavy or light pieces perfectly. Does a thorough job of cleaning in a short time.

Does away with all the hard work—saves a lot of time—and actually protects the clothes.

Has a power wringer. You merely feed the clothes through it. And when not used for washing you can hitch your churn, separator, grinder, etc. to the special pulley wheel and the little Multi-Motor will operate them for you.

Why make the family washing a weekly ordeal—when the cost and operating expense the Maytag is so reasonable. Go to your local Maytag dealer and see this machine.

REMEMBER—See Your Dealer First

of Calgary.

Your Patronage is Solicited.

A Trial is all I ask.

The Chautauqua is once more a happy memory. At the close of Wednesday's programme a guarantee was inaugurated to have the Chautauqua again next year. There was a deficit on this years undertaking, but despite this, a good number promised by their signature on the guarantee to back up next years Chautauqua. A meeting was held at the close and a committee was formed, Mr. L. V. Leitch was elected President, with Mr. F. L. Walters as Secretary-Treasurer.

The Council of the Municipal District of Rosboud No. 280 held its regular meeting in Crossfield on Friday, July 16th, 1920. All members were present.

Minutes of last regular meeting read and approved. Account of E. D. High for 1919 road work was left to arbitration by agreement.

The following accounts having been found correct were ordered paid, viz: Havens Garage, \$5.40, A. Jossman 45.00, G. Retschlag 109.79, J. Morrison 3.50, J. M. Johnston 13.50, West Corrugated Culvert Co. \$73.23, Atlas Lumber Co. 1933.15, Wm. Lant 29.50, Union Iron Co. 44.44, J. Belshaw 2.00, Freight 4.57, Crown Lumber Co. 1.10, John Deere Plow Co. 127.78, D. F. A. Co-operative Association 150.82, Sawyer Massey Co. 3.23.

The following Day Labor Pay Sheets properly signed were passed for payment viz: Division No. 1 \$806.20, Division No. 2 \$1132.50, Division No. 3 \$773.75, Division No. 4 \$1146.00.

After a lengthy discussion the Municipal Tax rate was fixed at 6 mils on the dollar.

On motion of the Reeve, Division No. 2 was granted \$600.00 from the general funds as arrears due from previous years. After discussion as to the liability of Poundkeeper Bills in connection with costs incurred by an irregular Pound sale, the matter was laid over for further particulars.

John Morrison was appointed Deputy Reeve for the remainder of the year.

Councillor Whittaker was appointed to arrange for road diversion on Wilfred Hurt's land.

Sec. Treas. was instructed to notify C. P. R. re crossings of Irrigation Ditch also parties having road allowance fences to remove same and save costs.

Next meeting in Carstairs, Aug. 13th.

Tenders for the Purchase of Two Farm Buildings

Forasmuch as instructions the Soldier Settlement Board of Canada is calling for tenders for the purchase of two farm buildings on the later training Centre Farm near Crossfield.

These buildings comprise:

One frame Bunk House 24 x 80, 7 ft. Eaves, One-third pitch roof.
One frame Dining-room and Kitchen 24 x 40, 7 ft. Eaves, One-third pitch roof.

Both of these buildings are on wooden block foundations and could easily be moved. The larger building is constructed so that it could be conveniently cut into three sections. They were erected early this spring and are therefore practically new. They are situated on the North-West quarter of Section 5, Township 29, Range 2, West of the 5th Meridian, about 12 miles west of Crossfield.

The Board reserves the right to reject any tender.
All communications should reach the District Superintendent, Soldier Settlement Board, Calgary, not later than the 31st of July, 1920.

(Continued.)

CHAPTER VI.

A big man, past middle age, and aged astride a small white horse, came picking his way between the huge beech and maple trees, down through the quiet morning of the woods. He had shaggy red brows, and a big mouth that drooped at the corners. The little eyes, flashing side in search of the blaze on the trees, were sharp and calculating. Where the ridge sloped to the valley he reigned up.

"Must be somewhere about here," he mused aloud. "Don't know how I can miss seeing McTavish if he happens to be outside—land knows he's big enough to see—hell who are you?"

Something animated in the shape of a boy had stirred from a log directly in the path. Leaping out it stood before the rider—a boy with long yellow curls and big brown eyes. The old white horse shied, and the boy rocked backwards and forwards on the path, voicing low, plaintive sounds. As the rider watched him a small animal crept from the thicket and climbed upon the lad's shoulder. The horse reared, and the boy, lifting his brown arms, began to wave them to and fro. At the same time he broke into a wild, tuneless chant, the words of which were unintelligible to the wondering observer. It was a shrill, weird note, fluted and varying like the call of a panther. Suddenly boy and animal vanished as though the Wild had reached forward and gathered them into its arms.

"Heavens!" shuddered the man, and struck the horse sharply with his spurs. Where the trail curved off abruptly to the valley he reined up once more and turning about, looked back.

"Well I'll be shot!" he soliloquized. "No matter where you find the Creator's handiwork and beauty you'll find His imperfections too. Ugh! how those big eyes did probe me! It's enough to make a saint shiver, let alone a chap who has climbed up as I have—not caring who I've trampled on."

He shivered again, and felt in his pocket for his pipe. His hand brought forth a yellow wallet. A hard smile warped his mouth as he opened the wallet and drew out a small photograph. It was the likeness of a young woman with sweet face and great eyes. He tapped the likeness and a lock of brown hair leaped out like a snake and twined about his finger. He brushed it back with a shudder, and snapping the case, put it back in his pocket.

"I'll find that big McTavish and get this deal closed," he mused as he rode along.

The horse stumbled and a grouse whizzed along the trail, passing close to the man's head, with a thundering nerve-racking sound. He sat erect and sank his spurs into the old gray's heaving flank.

"Get epp, you lazy old bag of bones," he commanded. "Let's find that big innocent and get hold of his deed. We'll give him a dollar or so to see us back along that lonesome trail. I wouldn't go back alone that spooky path for all of old Hallibut's money. I've seen enough snakes and moles and bears since two o'clock this morning to last me a lifetime. And that last animal—that crazy boy!—ugh!"

He slashed the old mare into a faster walk and sat huddled up and pondering until a twist in the path brought an open glade into view. The buzz of a saw and the pant of a weary

Wonderful Strength For Weak Stomachs

Everyone Talking About the Cures Made By Dr. Hamilton's Pills

There are despairing men and women by the thousands in this city, whose stomachs keep them in constant misery that can be quickly restored to vigorous health by Dr. Hamilton's Pills.

We know of no other medicine that possesses such power to kindle into new life the exhausted energies of chronic stomach sufferers.

There is an extraordinary power in Dr. Hamilton's Pills that searches out the weak spots, that braces up the delicate glands and complex workings of the stomach and bowels. There are invigorating, stimulating tonic ingredients in Dr. Hamilton's Pills which are derived from powerful juices taken from rare herbs and roots, and these are scientifically combined with other medical products so as to assist in harmonious and proper working of the entire system.

The ingredients of Dr. Hamilton's Pills, coming from the great storehouse of Mother Nature herself, are free of all that is harmful. Guaranteed results follow to all those who use Dr. Hamilton's Pills for Stomach, Weakness, Gas, Sourness, Headache, Biliousness or Constipation.

Seekers of the better health need do better than invest 25c in this health-bringing family medicine.

engine came to his ears like welcome music.

"Trotter!" he chuckled. "Let's see, Bushwhackers' Place lies just across from it. But there's the creek. Guess I'll have to ride down to the narrows."

Finally, with much grumbling, he reached the farther side of the creek, and, pulling in his horse, he gazed about him.

"Ha, look at that for timber!" he exclaimed. "And to think that Smythe and I will have control—"

He did not finish the sentence aloud but sat nodding his head up and down. Very soon he drew up before the long log-house. Big McTavish stepped out and pointed to a log-building in a grove of buttresses.

"Put your horse in there," he invited.

"I will, and more," agreed the arrival. "I'll enjoy a bit of bread and a slice of dried venison or anything else, your larder affords. I'm hungry as old Nick."

"You're welcome to the best we have," replied McTavish. "You'd better, Mr. Watson, I suppose. Am I right?" "Watson I am—Robert W. O. Watson, that's me. I'm pretty well known through these parts; that is to say, better maybe a little east of here. This place is kind of off the map, you know. Just give the lazy state anything that's handy," he growled, referring to the patient steed that stood with drooping head and sanctimonious air, "but you needn't be in any hurry to feed her. She's Smythe's horse and used to waiting."

"I always see that my oxen get their meals same as I do," said big McTavish. "I wouldn't feel just like eatin' unless they had their fodder, too. We'll step inside and I'll have Gloss fix you up a meal. She's down at the spring now gettin' the cream ready for the churnin', but she'll be back direct."

As they crossed from the stable a small form fitted by them and vanished among the trees. Watson gasped and he clutched McTavish's arm as if he were a snake.

"That's him," he cried, "that's the crazy boy I met a couple of miles away. How did he get here so soon do you suppose?"

"Oh that's Daft Dave," smiled McTavish. "Nobody knows exactly when he'll turn up. He runs like a deer and is as shy as the wild things he plays among."

"Plays among," repeated the other. He followed McTavish into the house and sat down heavily on a stool. "What do you mean by 'plays among'?"

"I mean that he moves among the wild things and they are not scared of him same as they are of you or me or anybody else. They do say that he can fondle the cubs of bears, and wolf-kittens. I've seen him play with a big snake myself—not a poisonous one, of course. Seems as though Dave can pick out the things that are harmful quick enough. No."

W. N. U. 1325

body pays any attention to him much in Bushwhackers' Place, but leaves him to himself, knowin' that God'll protect the soul He didn't give over-much reasonin' power to."

"Humph," grunted the other, "I see you're a pious man, McTavish—pious, God-fearing and honest. Good play to work along that line. Had a good bringing up myself. Mother's prayers, early teaching, and that sort of thing have a lot to do with making a big man. My mother is largely—I should say was largely—responsible for my success. She's dead now, poor old lady. Of course, a fellow who climbs has a right to some of the credit himself, I suppose. Made up your mind, I can see, to swap this forsaken wilderness for a piece of cultivated land," he said, abruptly opening the subject nearest his heart and fixing on the big man his little pig-cyes.

(To be continued.)

New Bankruptcy Act.

The Bankruptcy Act, passed at the first session of 1919, came into force on the 1st of July, under the provision of a proclamation issued in January last. Some amendments, which consideration of the Act during the last year showed to be necessary, were made at the session just prorogued. The rules, which contain very important provisions respecting the carrying out of the Act, have recently been passed by the Governor-General-in-Council.

No Alimony—Just a Separation

Peaceful, quiet separation, no damage done, everybody happy again—that's the situation when you divorce your corns with Putnam's Corn Extractor. Acts like magic—don't use any but Putnam's—it's the best, 25c at all dealers.

The Married Teacher

No Reason For Prejudice Against Employment of Married Women

It should have been needless, but it was probably wise, for the Carnegie Foundation, by the report of a distinguished committee of educators, to denounce in strong terms the remaining prejudice against the employment of married women as teachers.

Says the committee: "There is probably no work in which marriage and a normal home life could contribute a qualification more essential than they could to teaching."

The woman teacher is too often a "detached public servant in a class apart. If married and a householder having children, she becomes a vitally interested and respected factor in society."

A part of the old prejudice against married teachers took root in the silly cry: "Let them stay at home, and give the girls a chance!" Such sacrifice of the skilled veteran to the beginner was unwise at any time. It is simply ridiculous now, when hundreds of thousands of children have no teachers at all, and other hundreds of thousands but inefficient substitutes. Yet in how many cities as in New York, are there traces of the old feeling even in the formal rules of Boards of Education.—New York World.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. You must say "California."

The Value of Trees

One Square Yard of Leaf Surface Purifies Great Amount of Air

It has been calculated that a single tree is able through its leaves to purify the air from the carbonic acid arising from the respiration of a considerable number of men, perhaps a dozen, or even more. The volume of carbonic acid exhaled by a human being in the course of twenty-four hours is put at about 100 gallons, but scientists estimate that a single square yard of leaf surface, counting both the upper and the under sides of the leaves, can, under favorable circumstances, decompose at least a gallon of carbonic acid in a day. One hundred square yards of leaf surface there would suffice to keep the air pure for one man, but the leaves of a tree of moderate size present a surface of many hundred square yards. All other forms of vegetable life act similarly in abstracting the noxious carbonic acid from the atmosphere.

Every time a man falls to make good he invents a new secret.

Married men imagine that heaven is a place where there is no house-keeping.

Cuticura Ointment Is So Good For The Skin

For eczema, rashes, pimples, irritations, itching, chafings and dandruff on scalp, as well as for cuts, wounds, bruises and bites and stings of insects, Cuticura Ointment truly wonderful. It is so soothing and healing, especially when assayed by Cuticura Soap. First bathe the affected parts with Cuticura Soap and hot water. Dry gently and anoint with Cuticura Ointment. This treatment is best on rising and retiring. Soap 25c, Ointment 50c and 100c. Sold throughout the Dominion, Canadian Dispensary, Limited, 25, Peel St., Montreal. Also Cuticura Soap shavers without water.

Seal in all the Flavor

IMPERIAL Parowax—seals in all the natural flavors of fresh fruit into your preserves. The safe and sanitary way to preserve fruits, jams, pickles or vegetables. Saves time, labor and money.

The Parowax way is the easy way. Just pour the melted wax over your cooled preserves and it solidifies into a clean, air-tight seal—just-proof and moisture-proof.

IMPERIAL
parowax

a pure refined white wax, odorless, tasteless, colorless, absolutely sanitary—no chemicals or acids.

Placed in your wash-boiler, Imperial Parowax loosens the dirt, bleaches the clothes and removes the greasy spots that otherwise require so much rubbing. Rubbed over your iron, and mixed with your starch, it gives that finished lustre to ironing that is so much desired.

Imperial Parowax, a household necessity.

For sale by good dealers everywhere.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" stamped on tablets positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package of "Bayer Tablets of Aspirin" which

contains proper directions for Colds, Headaches, Toothache, Rheumatism, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monocristalline of International. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Your Gravelled Eyes

Eye inflamed by exposure to dust, heat and wind quickly relieved by **Murine Eye Drops**, No Stinging, No Irritation. At Every Dispensary or by mail 60c per Bottle. For Book of the Eye write to **Murine Eye Remedy Co., Chicago.**

PRAIRIE SOIL IN DANGER OF LOSING FERTILITY

EXPERT ISSUES A WARNING

Present Methods of "Mining" Soil
Will Soon Lead West to
Disaster.

Winnipeg. — Warning against the "mining" of Canadian prairie lands by "get-rich-quick" settlers who take abundant crops for a few years without re-fertilization of the ground, was sounded at the conference here of the commission on conservation of soil.

The fate of this nation depends chiefly on the fertility of its soil," declared Prof. Hanson, "and our soils are rapidly losing their basic strength in organic matter and nitrogen. We must seek immediately to correct this."

"One of the problems which confronts us is drifting lands, due to lack of soil fibre. Land drifting is causing as much loss in some districts in the west as rust and insects."

He outlined the results of the preliminary experiments and tests being made in Manitoba to determine proper methods to prevent drifting. "While this work was far from completed, the result of the work already done," Prof. Hanson said, "led him to believe that the bromo grass was the easiest method of returning the fibre to the soil."

"Farming under irrigation has been practiced in all parts of Canada and the United States profitably and should be encouraged," he said, and should be encouraged.

"Carelessness in cultural methods was asserted to be undoubtedly the greatest existing cause to agriculture in Canada," said Dr. J. H. Grisdale, deputy minister of agriculture.

In his analysis of conditions of the Canadian prairies, Dr. Grisdale stated the causes for the gradually decreasing yield in bushels per acre from the cereal crops would appear to be: Prevalence of weeds, lack of fibre in soil, poor moisture conservation and poor cultural methods employed by the farmers.

Among the remedies suggested were the introduction of certain hood or cultivated crops in some parts and quick maturing crops in other districts, together with better cultural methods to aid in weed control.

Want Salary Boost

Postmasters to Work for Short Hours and More Pay.

Winnipeg. — Shorter hours, increased salaries and time and a half pay for overtime, were resolved upon as the coming year's objectives by the Canadian Postmaster's Association at the concluding session of their convention here. Other resolutions adopted included a request for participation in the civil service bonuses, and a demand that special consideration be given the pay basis of postal officials at customs ports and to officials on night shifts transferring mails from trains.

Affiliation of the association with the railway postal clerks, city postal clerks and letter carriers' associations was recommended. All of the officers were re-elected.

Riot at Trieste

Trieste. — Hotels and stores belonging to Jugo-Slavs were sacked and burned in a wild anti-Slav demonstration here Tuesday. Scores of persons were injured and property destruction is continuing, bombs and inflammables being used by the elements engaged in the disorder.

Alberta Coal for East

Windsor, Ont., Acting on the advice of the fuel controller, the city council yesterday placed orders with nine operators in Alberta for large supplies of coal to be shipped immediately. Information gathered here shows that this coal can now be transported here as cheaply as coal from the United States.

W. N. U. 1225

Opium in Egg Case

Mounted Police Discover Avenue By Which Drug Was Being Shipped to West.

Ottawa. — The accidental discovery at Papineauville, Que., a few days ago by the Canadian express authorities of a quantity of opium which was consigned to Calgary, has furnished the Canadian mounted police with the avenue by which they believe quantities of this drug have been shipped to the west during the past few months. For some time past a Chinese restaurant keeper at Papineauville has been in the habit of consigning one, two or three cases of eggs at a time to a fellow celestial at Calgary. There had been no suspicion attached to the shipments until one day last week when one of the cases of eggs forming part of a shipment, was found to be leaking. The express company officials reported the broken case and when examined the case was found to contain opium.

In the meantime, the consignor apparently got wind that the jig was up for he has disappeared. The investigation is going on and the consignor is also being sought.

Meighen Cabinet Complete

Ministers Have Been Sworn In With Exception of Hon. S. F. Tolmie.

Ottawa. — With the formal swearing in of Hon. P. E. Blondin, as postmaster-general, the ministry of Hon. Arthur Meighen is now complete, with the exception of Hon. S. F. Tolmie, who will be sworn in by the clerk of the privy council on his return to Ottawa, as minister of agriculture. He is at present in Saskatchewan.

Hon. P. E. Blondin takes the same position that he held in the cabinet under the government of Sir Robert Borden.

Allies Must be United

Millard Says That Accord is the Thing That Will Count.

Spa, Belgium. — Premier Millerand, in an interview with correspondents, declared that the financial conference will be held July 23, as scheduled. Speaking with deliberation, he said that the allied governments had maintained that unity which "is more important than the German attitude." He went on:

"If the allies are in accord, Germany will do what we want. If they are not in accord we cannot make Germany respect the treaty. My impression is that the Germans have a pretty good idea that we have a definite plan, and hope to follow it."

By-Elections Coming

Ottawa. — There is still no announcement as to when the necessary two by-elections in the maritime provinces will be held, but the forms necessary under the new franchise Act are being got into shape for whenever the contests do take place. It is expected to take some time yet before everything is in readiness for taking the vote in any of the ridings open.

Climbed All the Way

St. John, N.B. — Hadley McKinnon, for many years business manager of the St. John Standard, today purchased the entire interests of that newspaper.

Mr. McKinnon has occupied every position on the paper, having started in as printers' devil.

A Baseless Charge

Vancouver, B.C. — W. H. Armstrong, for three years, director of coal operations for Alberta and southern British Columbia, gave a denial to the charge frequently made by leaders of the One Big Union movement that the Dominion government was forcing miners to enter a foreign organization.

Ex-Empress' Estate

London. — The estate of the late Empress Eugenie is valued at considerably more than £2,000,000, according to the Daily Mail. Some of the jewels of curious design are valued at almost priceless.

MIXED FARMING IS ADVOCATED BY HON. S. F. TOLMIE

MIXED STANDARD PAYS BEST

Agriculture Minister Has Great Faith In The Future of the West.

Saskatoon. — "It is the duty of the Dominion and provincial department of agriculture to aid the development of mixed farming in all parts of Canada," was a statement made by Hon. S. F. Tolmie, minister of agriculture, when officially opening the Saskatoon exhibition. "It behoves us to develop our farming on the mixed standard rather than on that of any particular line. Great Britain is an example of what can be done by a nation when it determines to develop its agricultural interests in more than one single way."

The minister then referred to the growth in stock breeding with the British Isles, and showed what Great Britain had done for the people. "Our government takes a great interest in the development of agricultural exhibitions, believing that they render an equal benefit to rural and urban districts alike. They not only stir the ambitions of the farmers and create competition between them, but they also bind together farm and city. This is the main important factor."

Referring to the western provinces, Dr. Tolmie said he had a great belief in their future, and he thought that there was room enough for all industries.

Want Board Reappointed

Canadian Council of Agriculture Decides to Take No Further Action In Political Organization.

Winnipeg. — The Canadian council of agriculture concluded the business of its annual meeting by deciding after long discussion, to take no further action towards political organization that was provided for last January by which organization is to be carried out on a provincial plan.

The principal subject discussed was whether there should be a central coordinating committee to take charge of a political platform.

A formal resolution was passed requesting the federal government to immediately reappoint the existing Canadian wheat board for the purpose of marketing the wheat crop of 1920.

J. R. Howard, president of the American Farmers' Bureau, addressed the council on the object of the co-operative marketing program of this organization. He said they aimed to eliminate the brokers. He invited the council to send representatives to a conference to be held in Chicago, on July 23 and 24, the object of which, he said, was to make mid-west states a power on the Chicago board of wheat marketing.

An application has been received from the United Farmers of Nova Scotia for membership, so that now the council is composed of representatives of the farming organizations of Alberta, Saskatchewan, Manitoba, Ontario, New Brunswick and Nova Scotia.

The Fighting Irish

Sinn Fein and Unionist Stage Belfast Battle.

Belfast. — About 2,000 Sinn Feiners and Unionists had a fight in Lurgan over the capture of a man who is alleged to have participated in a recent raid on a mansion near Lurgan. Many persons were wounded in the fighting. A party of troops from Belfast arrived in the town and removed the man from Lurgan. The trouble had its origin in a demand by the Sinn Feiners for the release of the man which the Unionists opposed.

Lithuania Signs Peace

London. — Peace between Lithuania and Soviet Russia has been signed in Moscow, according to a wireless message from Moscow.

Wheat Stores Must Be Reported

Canadian Wheat Board Demands Return From All Licensees.

Winnipeg. — A new regulation, No. 143, of the Canadian wheat board, orders that all licensees of the board other than milling licensees must file with the board sworn statements of their stocks of wheat by midnight July 31.

The regulation also provides that licensees must make delivery to the board of all wheat purchased by them as licensees of the board on or before August 15, in store at public terminal elevators located at Fort William or Port Arthur, and on production of the proper documents of title, the board will pay, or cause to be paid, this cash payment faced by other regulations of the board.

Find Amber Deposit

Prospector Reports a Rich Discovery In Manitoba.

The Pex, Man. — With a gunny sack full of pure amber, Jack Murray, former editor of the Canadian Mining Journal, has returned from Cedar Lake, 80 miles southwest of here, where he reports a plentiful supply of amber is scattered about the sand and the muck on the borders of the lake. He states that a canoe could be filled with it in less than an hour. The presence of amber at that place has been known for several years, and Jack Murray examined it for New York and Toronto interests its value was unknown.

Col. J. B. Miller, of the Parry Sound Lumber Company, and Major Craig, of Toronto, have left here for the amber fields.

News of the Provinces

MANITOBA

Winnipeg, Man. — Col. W. G. Barker, V.C., the famous Canadian ace, is in the city recently arriving for the disposal of twenty-five aeroplanes for the United States and Canada. The Bishop-Barker Company is commencing a week-end service from Toronto to Muskoka Lakes, and he predicted an aerial service between the Queen City and Winnipeg within the next five years.

Winnipeg, Man. — Flax fibre, grown and manufactured in Manitoba by the Netherlands Canadian Flax Co., brought one thousand eight hundred dollars per ton on the open market in Belgium. This was manufactured in the Beausœur plant, and brought ninety cents per pound.

Brandon, Man. — J. M. Lohr, a Minnesota farmer, has purchased 7,200 acres of land near Gunton, and is breaking with a view to seedling with flax next year. In addition, he has rented five sections near Sperling, Man., which are seeded to flax this year.

SASKATCHEWAN

Regina, Sask. — Latest report of crop conditions in Saskatchewan issued by the Provincial Department of Agriculture, is said to be the most favorable report ever issued by the Province. It comprises reports from 57 points, representative of the whole province, every reporting point testifying to the healthy state of the crop.

Saskatoon, Sask. — Milk producers' patronized provincial creameries now total 26,300, as against 19,700 twelve months ago. These figures only include shippers to the large plants submitting reports to the Government.

Moose Jaw, Sask. — Although in operation only four and a half months, the Southern Saskatchewan Stockyards have proved a successful undertaking. During this period, a total of 486 cars have been handled, comprising 29,000 head of livestock. The yards at the present time are capable of accommodating 3,000 head of cattle, and extensions of considerable dimensions are already planned.

MAY PROHIBIT COAL EXPORT FROM CANADA

STATES WILL BE EXCEPTED

Conservation of Fuel Supply In View of the Almost Certain Shortage Next Winter.

Ottawa. — It is understood that as the first step towards conservation of the fuel supply, in view of an almost certain shortage next winter, the railway board will, in the near future, issue an order prohibiting the export of Canadian coal, excepting to the United States and Newfoundland.

It is also understood that the order will prohibit the bunkering of ocean going vessels at Montreal with American coal. This practice, it is stated, has resulted in the serious depletion of stocks of American coal brought to Canada. After the issuance of the order, it will be necessary for vessels to bunker with coal which is the product of Canadian mines.

At a conference of the members of the railway board, the coal situation was given preliminary consideration and it is anticipated that measures other than these will be evoked to conserve the fuel supply. Seen after the conference, Chairman Carvell said he had nothing further to announce at present.

Winnipeg. — Gordon Bray, three-year-old son of R. E. Bray, one of the leaders in last year's Winnipeg strike and now serving a jail term, was burned to death here while playing with matches.

ALBERTA

Calgary, Alta. — Further prospects for oil development in Western Canada are announced by the western superintendent of the Imperial Oil Company. In addition to the several wells the company are sinking in various parts of Alberta, a new prospect has been opened at Consul, Sask. The well at Gar, Alta., is down about 1,400 feet, and progress is being made west of Nanton. In the far north, drilling is proceeding on Great Slave Lake and the McKenzie River.

Calgary, Alta. — The assistant manager of the Canadian Co-operative Wool Growers, states that Alberta will set co-operatively a million and a half pounds of wool this year, or a quarter of the total Dominion sales.

Lethbridge, Alta. — The Dominion Government is ready to aid in the financing of the Lethbridge northern irrigation project. Strong resolutions have been wired to the Provincial and Federal Governments by the Boards of Trade and farmers' organizations in the south country urging the two Governments to co-operate in financing the construction of the project until such time as the bonds can be sold.

BRITISH COLUMBIA

Victoria, B.C. — E. S. Oliver, a chemist who has been investigating processes for the extraction of turpentine from the Douglas Fir, claims to have perfected a process. He has obtained a number of resin knots from the B.C. government and intends to commence operations at once.

Cranbrook, B.C. — It is reported that the Consolidated Mining and Smelting Company will reopen the St. Eugene mine at Moyie. This mine has produced over 5,000,000 ounces of silver and 229,000,000 lbs. of lead, valued at more than \$10,000,000.

Kamloops, B.C. — J. W. French, a big-game hunter from eastern Canada, reached here with a record bag, comprising nine grizzlies and three black bears, after a six weeks' hunt north of Revelstoke and Shuswap.

Experimental Work Is Ruling Out the Risk of Farming

The appointment of Professor John Bracken of the University of Saskatchewan to the presidency of the Manitoba Agricultural College, has called attention to the invaluable research work which has been undertaken at the former institution during the last ten years on the subject of crop production. Ten years ago when Mr. Bracken came to Saskatchewan, the University consisted of a very fine site, a handful of professors and a room or two in one of the block buildings of Saskatoon. As in the fields of literature and science, so in that of agriculture, everything had yet to be done.

In a recent conversation the retiring director of field experiments at the University, expressed the keenest regret at leaving the work with which he has been so intimately associated and which now promises such rich returns to the Province of Saskatchewan.

Seeking the Best Crops

"Since this work was started ten years ago (said the Professor) there have been tested out over 600 different varieties of crops of over 60 different species. As a result we are now able to say definitely which of these crops are not suitable to western conditions, and which crops are likely to give the best results for different purposes.

"These findings are available, not merely for the man who attends the University, but for every farmer in the Province; for the results have been embodied in some twenty-eight circulars published from time to time on various phases of crop production. The information is also disseminated widely by the Extension Department and is available for every speaker sent out from the College of Agriculture. By extensive correspondence, too, the results are made widely known.

"The practical outcome of the work has been to determine just what crops are likely to prove the most profitable, at least in West-Central Saskatchewan—the best cereals, the best hay, for pasture, for fodder and for silage. Previously there was only guess-work, and farmers failed to make good through ignorance of many facts which are now well established. By appropriating the available information graingrowers may now avoid many of these pitfalls which in the past have made crop-raising such a hazardous business.

Crop Management

"In addition to determining what crops are best suited to the West, we have endeavored to find out the best time and method for planting; the best amount to sow, and the best time and method for harvesting, curing and storing each of the crops now used by farmers. Every common crop grown in Western Canada has been planted at the University at five different times every spring in as many different plots and at five different rates per acre; and each of these crops has been harvested at different times and in different ways—accurate records of the agronomic data being kept for every test. Thus there is now at the University an accumulation of facts which when summarized, constitute an invaluable guide to farming under conditions similar to those existing at the University, which may be taken as typical of the largest soil type and climatic zone in the Province.

Plant Breeding and Selection

It is, however, in the work of plant breeding and selection that the work of the department has been most pronounced. Literally hundreds of thousands of plants have been worked over, and scores of crosses made, in an effort to produce better yielding strains.

"We have now (continued the Professor), thanks to the indefatigable efforts of Cameron, Saville, Kirk, Henry, Harrington and others who have been associated with the work, we have now for every crop that the farmer grows in this Province, one or more varieties that during a period of from 3 to 5 years, have proven superior in carefully con-

ducted tests to anything now being grown in Saskatchewan.

"Take barley, for instance. The commonly grown sort is O.A.C. No. 21, a six-rowed variety. An introduction brought in from Sweden ("Hannchen" barley), from which we have a very promising selection called "Surprise" has yielded 16 percent more in an average of 7 years testing than O.A.C. No. 21, which is its nearest competitor.

"It is not too much to say that the University selections will mean, in the next ten years, an increase in wealth of many millions of dollars to the Province. The use of this Hannchen variety, on the acreage now sown to barley in Saskatchewan, would result in an increase in yield each year sufficient to pay the total capital expenditure at the University since its inception. And this is only one instance among several that might be quoted.

New Crops

"The work at the University has shown that new crops are likely to play an important part in western agriculture. Kubanka wheat, for instance, has been shown to be more drought and rust resistant than any other wheat, and it deserves a place in the southern parts of the Province. A new and, as yet, unnamed, oat has been found which is slightly more productive than the highest yielder heretofore used. A very productive variety of spring rye, known as "Proctor," has been discovered; while a heavy-yielding variety of flax, known as "Crown," promises to outclass all others in productive power.

"We have also a new early pea ("Early White"), and a heavy yielding "later variety" ("Carlton"). In the field of fodder crops the possibilities of sunflowers for silage purposes have been amply demonstrated.

"These are all new introductions that have not been and are not now being grown to any extent in the Province, but which will be made available for farmers as soon as they can be increased for distribution.

A New Sweet Clover

"Several very hardy strains of alfalfa have been developed for western conditions, and one outstanding strain of sweet clover has been discovered and named "Arclet" on account of its unusual hardiness and general suitability to northern conditions. It is quite possible that "Arclet" sweet clover may prove to be just as big a step in making permanent our western agriculture as the summerfallow was in making possible its development.

"We have now reached the point where, on our older lands we have to make a change. We have, so to speak, been drawing on our bank account without making any deposits, and we cannot keep on doing that for ever. The problem 30 years ago was to develop this land; the problem now is to conserve it, and this is what our "Arclet" strain of sweet clover, with its nitrogen-obtaining quality will aid in doing.

Securing the Larger Yields.

"In studying the best methods of soil management, 21 different fertilizers or combinations of fertilizers have been applied annually at the University farm, and the effect of each measured on the yield of several different crops. One hundred and twenty annual rotations and forty perennial rotations are being tested out side by side. Summerfallow is being tilled in 16 different ways and measurement taken of the effect of each on the yield of five different crops. Stubble land is cultivated in 8 different ways each year and measured by the effects on each of five crops. Prairie and grass land are also managed in different ways and data on the relative yield secured.

Eliminating Chance

"As a result of all this the University is in possession of facts to advise farmers how to proceed. It is not a question (said the Professor),

of giving one's opinion, or of advancing some theory, but of quoting actual facts. Of course no one hopes to eliminate all chance in farming, but work of this nature furnishes facts which enable men to reduce risk to the lowest point. The practical aim of the University undertakings has been the elimination of chance by the accumulation of scientific facts; thus to build up a safe, sane and profitable system of farming in place of one that has been founded largely upon faith and tradition.

The Future

"In view of the work done, the next move will be the increase and distribution of the improved crops to the farmers. By way of extending the experimental work it has been proposed to undertake, in a small way, the different lines of work that would have been conducted at the University, on each important soil type and in each climatic zone of the Province. In other words to place a small edition of the University investigation field in each of the 8 or 10 districts in Saskatchewan. In this way similar valuable data would be secured for every portion of the Province.

"Another plan the department of Field Husbandry had in mind was the study by co-operation experimenters with hundreds of farmers in as many different parts of the Province of the best crops to grow, the best methods of growing them and the best ways of managing the land in each particular local district."

Our Most Valuable Asset.

Even a casual visit to the University impresses one with the fact that little about the prairie has been accomplished in the ten years of its existence. A chat with Professor Bracken certainly confirms this, and one begins to understand the remark that the University is "the most valuable asset the Province has." What the application of the results obtained in crop production alone will mean to the Province in the immediate years it would be impossible to compute. The wildest figures would probably be too small. And crops are only one feature of one department of the University activities.

It should be borne in mind that the department of Field Husbandry at the University does more than conduct crop experiments. Hundreds of young farmers (there should be thousands), fresh from each winter in order to learn the science of crop production; while for those who cannot so attend there is the extension work and the Better Farming Train each endeavoring to spread the information which the University, through its experiments, has been able to acquire.

At the beginning of this year the retiring head of the Field Husbandry department embodied the results of the crop experimental work in a book entitled, "Crop Production in Western Canada," which farmers of the West will find a veritable Bible on the subject of grain growing. It goes without saying that this work (the result of ten years of investigation work at the University of Saskatchewan), is the most authoritative text obtainable on the subject of western crops. It is the grain-growers' Guide. Farmers will be interested to learn that in the early fall of this year the same author will put out another work entitled, "Dry Farming in Western Canada."

The publication of two such works from so young a University as Saskatchewan literally "speaks volumes" for the standard of the work there being done, and the Province may well be proud of its chief institution. It is pleasing to know that when the East (if Winnipeg may be called "East"), wants big men nowadays it comes to Saskatchewan to get them. Professor Bracken's appointment is incidentally a great tribute to the University in whose service the new president has been able to build up the reputation which today places him in the front rank of notable agronomists.

It is more than gratifying to realize that so well have foundations been laid at the University that the crop experimental work will be carried on and extended by those who have been associated with the director in the invaluable work which proceeds day in day out at the Provincial Seat of Learning.

W. N. U. 1325

Practical Instruction In Agriculture is Better Than Book Farming

Teaching agriculture from a text book is a remnant of the earlier method in the development of agricultural education, as tried in the public schools. In Ontario, between the years 1845 and 1898, four different text books were used. At present there is no prescribed text book in agriculture in that province. Not that the printed word is a means of enlightening the mind is ignored. But for young pupils in elementary schools, the primer in agriculture is the book that lies open in every country child's every day observation and experience. The book is the Book of Nature as found in the farm. The teacher of agriculture directs the learner to that book, and helps him to read it. He learns from his teacher just as a farm child in a good home, with an intelligent father and mother, learns lessons in agriculture and in life every day. It is a

natural method of teaching and learning agriculture. It awakens an interest, it trains the powers of observation, it leads to inquiries and experiments; and the trained teacher, who is the chief guide in the intellectual development of the child uses these interests, these inquiries, these experiments as the solid ground-work for her building. She goes further in teaching agriculture than any home can.

The pupil seeks the help of books, but he is not primarily dependent

on books. There is created in him a taste for reading, and his reading is directed intelligently. But the method doesn't make "book farmers"; it makes interested intelligent reading farmers. Moreover, the book is not discarded, but given a place of honour; every country school should have its agricultural book-shelf.

To Conserve Helium

Canada is only Part of British Empire Having Helium

By the award of a grant of \$5,000 to assist Professor J. C. McLennan in his investigation of the properties of helium to determine its uses for lamps of various kinds, amplifying valves, high resistances, etc., the honorary advisory council for scientific and industrial research hopes to see accomplished a method of conserving helium, which at the present is being wasted in Canada at the rate of 1,000,000 cubic feet per month. Its value is estimated at not less than 10 cents per cubic foot. Most of the waste at present taking place is in the gas field of the Bow river district, near Calgary. In Calgary it is estimated that 12,000,000 cubic feet of helium is being lost yearly.

Canada is the only part of the British empire having helium resources and because of its peculiar lightness and other properties the gas has been highly regarded and has been in great demand for the inflation of lighter-than-air craft. Now it is hoped to find other uses for it also. The investigation now under way will involve also the liquefaction of the gas. It is understood that a large grant from the research appropriation of the University of Toronto is also to be available for extension of this work.

In Canada the gas is found chiefly in the Bow river gas fields, and the right to extract helium from the natural gas is held by the crown. The gas at Bow river contains 3 per cent of helium and the council is urging upon the government the necessity of conserving the supply, as the flow of both gas and helium in the West is diminishing rapidly.

For A Consideration

Spratt (gloomily)—I don't believe I have a friend in the world. Sponger.—You can make one; I need \$5.

PROF. JOHN BRACKEN.
Late of the University of Saskatchewan, appointed to the presidency of Manitoba Agricultural College.

Protection of Wild Fowl

Daily Bag Limits are Imposed in all the Provinces

Important changes are involved in new regulations under the Migratory Birds Convention act. Daily bag limits are imposed in all provinces and there are new restrictions with regard to protection of the birds imposed throughout Canada.

In Manitoba the open season for ducks is September 1 to December 14, both inclusive, and the bag limit is 20 ducks on any one day to October 1, and 40 thereafter in the aggregate of all kinds. Ten geese are allowed per day, 15 brant and 25 aggregate of rails, coots and gallinules. Plovers and yellow-legs are limited to 15; snipes, 25; woodcock, 10; doves, 25. The season's duck limit is 250.

Saskatchewan—Limits are 50 ducks, geese or brant, with the smaller birds the same as Manitoba. The season's limit is 250 birds, including ducks, geese or brant.

Alberta sportsmen may take 30 ducks daily, 15 geese, 15 brant. The season's duck limit is 200. British Columbia's limit is 20 ducks per day, 10 geese and 15 brant. The duck limit is 250 and geese 50.

The following shooting restrictions are imposed throughout all Canada: No person shall kill, or attempt to kill any migratory game birds during the open season, except with a gun not larger than No. 10 gauge.

No person shall kill, or attempt to kill any migratory game birds by the use of any automatic gun or battery, or by the use of an aeroplane, power boat, sail boat, or sunken boat. No person shall kill or attempt to kill any migratory bird between the hours of sunset and sunrise.

No person shall kill or attempt to kill from any motor vehicle or horse-drawn vehicle any migratory game bird.

There is practically no change in the regulations for scientific permits, but important new regulations are passed regarding the propagation of migratory birds, for the purpose of keeping tab upon and controlling the propagation of migratory birds in captivity, whether to be used for food, ornamental or zoological purposes, etc.

Taxidermists have to register in future and secure a license at a fee of one dollar.

Colonizing Canada's Farm Lands
A steady stream of immigrants from all parts of the United States continues to flow into the Battleford district of Central Saskatchewan, where a large area of fertile land, especially suited to dairying and general farming, awaits the settler.

As speaks in the highest terms of the wonderful luxuriant growth this year throughout the district and in practically every case the visitor decides to make that part of the country his future home, and to take part in its development.

Airplane engines have been adapted for driving motorboats and pumping machinery.

Benefit for Soldiers

Extend the Time In Which to Apply for Gratuity.

Provisions that will prove of great benefit to returned soldiers, their widows and dependents, are contained in two orders-in-council just passed by the government, endorsing certain important recommendations recently submitted by the parliamentary committee on re-establishment.

The first order-in-council extends the time in which a man who served overseas may apply for his gratuity. The time originally set as the limit in which he might apply was July 1, 1920, but this has been extended to March 31, 1921.

The payment of the dependents' portion of the war service gratuity to widows of deceased soldiers is authorized for the first time in the second order-in-council.

Minard's Liniment Relieves Garget In Cows.

The New Pension Scale

Canada's new pension scale is the most generous in the world. Compared with the United States, the second highest, which is \$1,200 a year per permanently disabled, whether married or unmarried, the Canadian scale is: Single man, \$900; man and wife, \$1,200; man, wife and child, \$1,380; man, wife and two children, \$1,540; man, wife and three children, \$1,640; each additional child, \$120. The scale is practically double that of Great Britain and Australia. —Simcoe Reformer.

\$100 Reward, \$100

Cataract is a local disease greatly influenced by constitutional conditions. It therefore requires a special treatment. HALL'S CATARACT MEDICINE is taken internally and acts through the blood on the diseased surface of the system. HALL'S CATARACT MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. \$100.00 for any case of Cataract that HALL'S CATARACT MEDICINE fails to cure. Testimonials free. Dr. J. J. Cheney & Co., Chicago, Ill., U.S.A.

British Liquidates Debt

Arrangements have been made by the British government to liquidate the debt of \$100,000,000 to Argentina. It is proposed to make this payment by meeting periodically the interest on Argentina's external debt held in London. The July 1 payment has been made and Great Britain has already liquidated half of her debt, which was for payment for cereals, by paying off obligations amounting to \$50,000,000 which Argentina owed United States bankers.

"I Wonder Would It Help Me?"

THIS question has been answered by many thousands of women who have found health and happiness in the use of Dr. Chase's Nerve Food.

Sleeplessness, irritability, nervousness, gloomy forebodings of the future, depression and discouragement—these are some of the symptoms which tell of exhausted nerves. In order to avoid nervous prostration or some form of paralysis it is well to get the building up process established at once by use of Dr. Chase's Nerve Food.

Be sure to get a box of Dr. Chase's Nerve Food, all dealers, or write to Dr. Chase, 100 E. 1st St., Toronto.

Red Cross Commissioner

W. F. Kerr Resigns Editorship of the Regina Leader to Engage in New Work.

Mr. William F. Kerr has resigned as editor of the Regina Morning Leader, a position he has filled for over eighteen years, to accept the post of Red Cross Commissioner for Saskatchewan, to which important office he was appointed at a meeting of the Saskatchewan Red Cross Executive on July 13, presided over by His Honor Sir Richard Lake, Lieutenant-Governor.

Mr. Kerr is thus the chief executive officer of the Saskatchewan division of the Red Cross Society and upon him is placed full

WILLIAM F. KERR.

responsibility for carrying out and administering the peace-time program of that organization in the Province.

The covenant of the League of Nations places upon all governments which are signatories to that covenant the duty of establishing, on a sure foundation, the noble work of the Red Cross. Formerly active only in time of war, it is now to continue its work in time of peace, and in the words of the League of Nations' covenant, "to encourage and promote the establishment and co-operation of duly authorized voluntary national Red Cross organizations, having as purposes the improvement of health, the prevention of disease and the mitigation of suffering throughout the world."

To Mr. Kerr is entrusted the task of carrying out this program so far as the Province of Saskatchewan is concerned.

Leveling Down Process

Carl Ackerman, a reliable press correspondent, cables from England that many factories are closing down there because of the continued demand of the workers for higher wages, and the reduced purchasing power of the public. And of course the more unemployment there is the less will be the purchasing power. The leveling-down process has started, and must continue.

Five great enemies to peace dwell with us, namely: Avarice, ambition, anger, envy, and pride. If these enemies were banished we should enjoy perpetual peace.

The Oil of the People—Many oils have come and gone, but Dr. Plummer's Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Smoking Bad for Aviators.

Air military doctors in Great Britain have instructions to inquire into the family histories of persons who desire to become aviators especially with reference to tuberculosis, heart disease, or mental instability among near relatives. Smokers are to be closely questioned, and the doctors are to make a note such as C10 or P3—that is, ten cigarettes or three pipes a day.

Minard's Liniment Relieves Diphtheria

W. N. U. 1325

A Fine Record

17,640 War Veterans Are Working For the C.P.R.

Every C.P.R. employee enlisting for war service was told that "his job would be waiting for him when he came back." Up to June authenticated statistics show that 11,018 C.P.R. men joined the forces. Of these, 1,096 were killed in action or died of wounds or sickness while with the colours, 2,084 were incapacitated by wounds, leaving 7,838 presumably available for re-engagement in the company's services. Some of these, however, re-enlisted with the permanent forces; others chose to remain in England or former other business connections. The remaining 6,914 are all again working for the company. In addition to this establishing its own manpower contribution to the war requirements, the company since the armistice was signed has employment for 10,726 other returned soldiers not previously on its payroll and now musters 17,640 war veterans—enough to form a complete army division of four brigades. All lines of the Canadian National Railways system gave up 5,000 odd men, about 50 percent of whom have been re-established.

A Thorough Pill.—To clear the stomach and bowels of impurities and irritants is necessary when their action is irregular. The pills that we do this work thoroughly are Par-melee's Vegetable Pills, which are mild in action but mighty in results. They purge painlessly and effectively, and work a permanent cure. They can be used without fear by the most delicately constituted, as there are no painful effects preceding their gentle operation.

Pigeons are most abundant in the East Indies.

NOURISHING FOOD AND GOOD HOURS

Help You to Resist Disease—Aid These With a Tonic to Keep the Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. Weaken this power when you let your general health run down, your blood gets thin and your nerves unsteady.

You weaken it when you worry, when you over-work, when you do not get sufficient sleep, when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiates and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. C. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was in a much run down condition, suffering from many of the well known symptoms of anemia. My mother procured a supply of Dr. Williams' Pink Pills, and after taking about a half dozen boxes I was restored to normal health. Again after my marriage, and before my boy was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely broken in health. Part of the time I was under the care of two doctors, and for three months I was practically between life and death. Again at my mother's suggestion I started the use of Dr. Williams' Pink Pills. I had not been taking them long before I could tell that they were helping me. Day by day I could feel my strength returning and was soon enjoying good health once more. In view of my experience I think I can safely say there is nothing in the way of medicine better than Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold at all medicine dealers or by mail at 50 cents a box, with postage for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

More varieties of fish are found in the Nile than in any other river in the world.

Countless have been the cures worked by Holloway's Corn Cure. It has a power of its own not found in other preparations.

Making Good Progress With Cattle Dipping

Hope to Eliminate Mange in Affected Areas Shortly.

The first stage of the compulsory dipping order for cattle in manged areas in southern Alberta and southwestern Saskatchewan has been completed, according to word received from George Hilton, chief veterinary inspector for the Dominion, who is supervising the move by which the federal department of agriculture hopes to practically eliminate mange within the next six or eight weeks.

All cattle in the area designated were ordered to be dipped and work started on June 24, the total number of vats used being 88. Within a few days 12 more had been added. Dr. Hargraves, of Medicine Hat, who is assisting with the work, reports that practically every stock owner had given the department their fullest co-operation. Weather conditions were perfect. Range-riders engaged by the department covered the territory to see that stragglers were brought in behind the general round-ups.

This is to certify that fourteen years ago I got the cords of my left wrist severed, and was for about nine months that I had no use of my hand, and tried other liniments, also doctors, and was receiving no benefit. By a persuasion from a friend I got MINARD'S LINIMENT and used one bottle which completely relieved me, and have been using MINARD'S LINIMENT in my family ever since and find it the same as when I first used it, and would never be without it.

ISAAC E. MANN, Metapedia, P. Q. Aug. 31st, 1908.

Use Curious Stone as Barometer

There is in the northern part of Finland a curious stone which serves the people instead of a barometer. This stone, which the Finns call Ilmankuri, turns black or a blackish gray when bad weather is approaching. Fine weather has the effect of turning it almost white. The Finns regard the stone with superstitious reverence, but the scientists say that its changes in color are due to salts contained in its composition.

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality. Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry!

Getting More Wheat

A Larger Average Yield of Wheat and Lower Average Cost Per

Improved fertility of soil, better cultivation methods and timely and successful fighting of pests, with sufficient labor at harvest time, appear to be necessary factors of a larger average yield of wheat and lower average cost per bushel produced. Climatic conditions of course, must be reckoned with and do not affect all wheat fields alike, because of difference in soil and location. The road to a greater profit for the wheat grower does not lie solely in the direct cost of higher price per bushel, but also in the various things necessary to increase the average production per acre. That is something which is up to the producers themselves.—St. Louis Globe (Democrat).

JUNIOR CHAUTAUQUA

The Junior Chautauqua was held for the children on the three days preceding the Crossfield Chautauqua. The Junior Hour consisted of Games and Stories and ended with Junior Sports on Saturday evening, the following are the events and the winners:

1. 50 yd. Race, Girls over 10
1st Audrey Brown
- 2nd Pearl McArthur
2. Three-legged race, Boys
1st E. Kline - H. McFadyen
3. Chariot Race- Girls
Won by Audrey Brown, Enid Brown and Margaret McLees
4. 25 yd. Race Boys 8 to 10
1st Roy Conrad
- 2nd Jimmy Boyle
5. 25 yd. Race Girls 8 to 10
1st Enid Brown
- 2nd Mollie McLees
6. 25 yd. Race Boys under 8
1st Alex Jessiman
- 2nd Lisle Wicks
7. Wheelbarrow Race
Won by Ernest Kline and Roy Conrad
8. Three-legged Race Girls
Won by Margaret McLees and Audrey Brown
9. Sack Race Boys
1st Ernest Kline
- 2nd Roy Conrad
10. Sack Race Girls
1st Pearl McArthur
- 2nd Enid Brown
11. Blind Race - Boys
1st Ernest Kline
- 2nd Roy Conrad
12. Blind Race - Girls
1st Margaret McLees
- 2nd Enid Brown
13. Relay - Team composed of
Pearl McArthur, Audrey Brown, Ernest Kline, Helen Swenerton, Alex Jessiman, Mollie McLees, Hugh McFadyen
14. Dodge Ball Contest
1st Gwendolyn Ontkes
- 2nd Leonard Pullan

The Chautauqua programme was brought to a close on Wednesday, the 28th inst., the entertainers for the evening performance being the Hampton Court Singers. A short address was given by Dr. Powell. The doctor is a forcible and inspiring speaker, and quite comes up to the reputation he has gained for himself as the 'Gatling-gun orator.' We have every reason to be satisfied with the talent provided on the Chautauqua program this year, and we are more determined than ever that the Chautauqua will become an annual event in Crossfield.

At the close of the Chautauqua programme a meeting of those interested in the movement was held for the purpose of organising for the next Chautauqua. Mr. Leitch was appointed chairman, and Mr. Watters, Secretary, and the executive will be formed in good time next year, to make all arrangements.

Forty-four signatures have already been obtained to the guarantee for the 1921 Chautauqua, which is very satisfactory. The committee wish to have as large a number of signatures to the guarantee, as possible, and those who have not yet signed are invited to do so in order that the full complement of 70 guarantors may be obtained. The form is in the hands of the Secretary, at the Bank of Commerce.

NOTICE.

We have still a few of Dr. C. J. Korinek's veterinary Books. The Veterinarian's are published at \$2.50 each, in order to dispose the remainder of these valuable books, we will sell them at less than cost, 50c. each. Anyone who has the handling of horses, cattle, swine, sheep and poultry can't afford to be without one of these books, while they last, at 50 cents each.
